Subject: Availability of High-Speed Internet Connectivity in Patharkhma

Sir,

We are pleased to announce that BSNL is commencing high-speed internet services in the Patharkhma and Jirang areas through FTTH (Fiber to the Home) technology along with 4G mobile services.

We would like to express our sincere gratitude for your dedicated efforts and continuous support in resolving various issues at our site. Your keen interest and motivation played a significant role in enabling BSNL to extend high-speed internet connectivity to these areas.

The availability of reliable high-speed internet in Patharkhma will bring a transformative change to the region. Educational institutions, colleges, hospitals, police stations, government offices, and other public service organizations will greatly benefit from improved digital connectivity. Students will gain access to online learning resources, healthcare facilities will be able to utilize telemedicine and digital services, and law enforcement agencies will experience enhanced communication capabilities.

Furthermore, the farming community will be able to access various Government schemes, agricultural information, weather updates, and digital services more efficiently, thereby contributing to their socio-economic development.

We once again thank you for your valuable support and cooperation in making this important initiative a reality. We look forward to continued collaboration for the development of the region.
